- 65 lb. suggested weight capacity per burner
- No open flame makes this a safer alternative to conventional countertop ranges

Certifications

1-15P

CE Listed

FCC Compliant

ETL US & Canada

Intertek

Notes & Details

Cook your customers' favorite dishes quickly with this Avantco IC18DB double countertop induction range/cooker. This unit features dual hobs that operate independently of each other, allowing you to cook two different dishes at once. The left hob operates at 300W to 1000W and the right hob operates at 300W to 800W. The total 1800W of power cooks food evenly at temperatures ranging from 140 degrees Fahrenheit to 460 degrees Fahrenheit, in 20 degree adjustable increments. The built-in timer can be set between 5 and 180 minutes in 5 minute increments. With only three functions, the controls are extremely simple for any employee to use. Just pick your wattage and cooking temperature, then set the timer and you are ready to cook!

This unit features a 60 second cool down fan and a lock button to prevent accidental cooking temperature and cooking time changes. Simply hold the "Lock" button for 3 seconds to initiate. To cut down on kitchen mistakes and ensure your food is cooking properly, the Avantco IC18DB will beep when a non-induction pan is put on the hob. This also means that the unit will beep when the pan is removed, so the induction-ready pan should remain in place during operation. This unit is compatible with pans 4 3/4" to 10 1/4" bottom diameter. This unit requires a 120V electrical connection.
